

# **JOB REQUIREMENTS: FULL-STACK DEVELOPER**

## **Description:**

We are seeking to incorporate a Full-stack Developer to join our growing team. IRIS is an advanced engineering company that specializes in process monitoring and control solutions & novel technologies for process optimization. You will work as part of a team of engineers involved in different R&D projects related to industrial solutions in different fields (food, pharma, automation, monitoring). We operate in a demanding high-performance environment where you will be continually stimulated and you will grow a lot. Up for it?

## **Job Functions:**

- Develop fast, scalable and highly available web applications.
- Dedicated to delivering tested and optimized high-performance, high-quality code.
- Work in an agile environment.
- Participate in resolution of production issues and lead efforts toward solutions.

## Requirements:

- BS or MS in computer science.
- At least 2 years of experience as FullStack developer.
- Familiar with the following technologies: JavaScript, Typescript, NodeJS and PostgreSQL.
- Strongly valuable knowledge of Angular, and experience working with Microservices Architectures.
- Docker knowledge.
- HTML5, CSS3, and a CSS knowledge.
- Eager to learn.

## Benefits:

- Working in challenging R&D European projects with a diverse range of partners.
- Product development working.
- Multi-disciplinary and multi-cultural working environment.
- Flexi-time working hours.
- Fridays afternoon off.
- A productive work environment.
- 23 business days of vacation + public holidays.
- Ticket Restaurant, Ticket Transport, Ticket Guardería (Optional)
- Private Insurance (Optional)
